

Advances in Complex Systems: From Ecology to Economics

LAKE COMO SCHOOL
OF ADVANCED STUDIES,
JULY 22–26, 2019

This is the third school on Advances in Complex Systems. The first edition of the school took place in the summer of 2015 and the second edition in the summer of 2017. The scope of the school series is to present recent advances in complex systems discussing applications of statistical mechanics of non-equilibrium and disordered systems, theories of complex

networks and other stochastic systems to different topics in materials science, social sciences, biology and biomedical research. The broad choice of interdisciplinary topics is designed to expose the students to some of the multiple facets of complex systems theory. The 2019 edition of the school will focus on interdisciplinary and quantitative approaches that span from ecology to economics. The school is open to graduate students and postdoctoral fellows working in complex systems and related fields. The Complex Systems Society is funding two fellowships covering the registration fee to the School on Advances in Complex Systems. Perspective participants who wish to apply for a fellowship should indicate this in the application form. To receive a fellowship participants are requested to become members of the CSS. Selection will be based on the CV and the motivation letter of the applicants. Selected candidates will be expected to deliver a short talk at the school.

SCHOOL DIRECTORS

Jean-Philippe Bouchaud
/ CFM, Paris

Caterina A. M. La Porta
/ University of Milan

Stefano Zapperi
/ University of Milan

LECTURERS

Pierpaolo Andriani / Kedge Business School, France

Giulio Biroli / École Normale Supérieure, Paris

Guy Bunin / Technion – Israel Institute of Technology

James S. Clark / Duke University

Anahid Jewett / UCLA School of Dentistry and Medicine

Giuseppe Longhi / Value of Differences

Matteo Marsili / Abdus Salam ICTP, Trieste

Ron Milo / Weizmann Institute of Science, Israel

Luciano Pietronero / University La Sapienza, Rome

Luciano Pilotti / University of Milan

H. Eugene Stanley / Boston University

Stefan Thurner / Medical University of Vienna

Two fellowships available,
